

Paper Roll Clamp

Let the
forklift
become a
universal
forklift

Functions & Applications

Designed for mills, warehouses, printers, newspaper publishers and converters.

Features

- Rational designed, compact structure, excellent driver visibility, easy operating, improve work efficiency
- Thin arm profile and smooth arm contour eases roll breakout
- Contact pads with integral casting structure, abrasion resistance, long service life. Contact pads surface reasonable, provide the best clamping friction
- Continuous 360° rotation, any angle position of lock function, revolving positing 90° or 180°
- Hydraulic retention of cylinder valves is to ensure reliable clamping of long distance transportation

Obtain the actual capacity of the forklift and attachments from the forklift manufacturer.

"A" fixed construction frame and fixed arm type, two sets additional oil circuit required on forklift.

"B" fixed construction frame and adjustable arm type, two sets additional oil circuit required on forklift.

"C" Rotating construction frame and adjustable arm type, two sets additional oil circuit and magnetic valve required on forklift.

Use "0" mounting angle when stacking operation higher than 6800mm.

Provide the Non-standard clamp plate as required.
